

## Java

```
class Solution {  
    public int numberOfAlternatingGroups(int[] colors) {  
  
    }  
}
```

---

## JavaScript

```
/**  
 * @param {number[]} colors  
 * @return {number}  
 */  
var numberOfAlternatingGroups = function(colors) {  
  
};
```

---

## TypeScript

```
function numberOfAlternatingGroups(colors: number[]): number {  
  
};
```

---

## C++

```
class Solution {  
public:
```

```
    int numberOfAlternatingGroups(vector<int>& colors) {  
    }  
};  
-----
```

## C#

```
public class Solution {  
    public int NumberOfAlternatingGroups(int[] colors) {  
    }  
}
```

## Kotlin

```
class Solution {  
    fun numberOfAlternatingGroups(colors: IntArray): Int {  
    }  
}
```

## Go

```
func numberOfAlternatingGroups(colors []int) int {  
}
```
